Article published on August 25th 2012 | Customer Service

If you are a user of Dell and you are in search of guides for the troubleshooting and the tutorials for your Dell printer you can take the Dell Support. The different types of Dell Support are available including support for the home users, support for small business and support for enterprise IT. There are many helpful websites available online that provides you the superb tips for you Dell Printer.

When you own a Photo Printer 924 of Dell company, this specific type of printer of the Dell Company covers two or more things. The 924 Photo Printer of Dell can scan, fax and print. This printer is able to offer the high-quality pages that follow the standards of the photo quality. This printer can malfunction; it can show the errors of software or hardware. Before seeking Dell Printer Support, you can reset the photo printer 924 of Dell as you need to turn off the power. Shut the printer and start it again with the help of the power switch located over the right bend of the printer 924. Keep waiting for a few moments as the light of the exhibiting screen appears.

Check the proper plugging option between the computer and the printer. Check all cables and the connections as this is the most important factor of trouble shooting. Check the USB cable from the laptop, desktop to the Printer 924. Judge the USB cord. The paper should stock well in the front tray. Pick up the face cover and verify that the ink cartridges with the adequate ink are accurately fastened. When the ink is low, the exhibiting screen will notify it.

Download the printing driver of the 924 Photo Printer of Dell again. It helps troubleshoot the printing problems based on software. Browse the website of Photo Printer 924 of Dell and locate the link at the area of resource. Download a file known as the G11AWeb32924EN.exe. Click save and then OK. Let the driver finish the downloading. Click onto the downloaded file twice. Click on the continue button. To finish installing, check the on-screens prompts. Restart the computer and go for printing. If it deems necessary, find the online Dell Printer Support.
