Summer Activity Holiday a Trip to Aurora Station in Abiska by [Julia Roger](#)

Article published on June 12th 2012 | [Destinations](#)

There are different ways of spending holidays during summer. While some people love to organize summer camps, others want to take part in activity holiday. Then, there are those who always love to enjoy outing with friends while hoping for wild summer adventures. There are plenty of ways to enjoy vacation time. It all depends on the mindset of people. Different people think differently. Accordingly trips get organized.

How about visiting the village of Abisko this summer? It is located within the northern part of Sweden. However, it is a popular tourist destination these days. The main reason behind its popularity is aurora station. Yes, different galactic observations can be conducted from this astronomical space center. In fact, Abisko enjoys strong sunshine all throughout the year. Sky remains clear mostly. Hence, aurora observation does not become difficult. It is a wonderful experience. The sun-emitted rays mix up with earth atmospheric particles and then create a massive explosion. Such an explosion results in emitting different colored rays and spreading it throughout the sky. It is truly an experience to share. People keep on coming to Abisko mainly to observe this galactic explosion.

The sky station does feature lodging facility as well. More importantly, it will be a wonderful experience to stay within those specially created guest rooms within this space observatory station. This will allow the guests to observe the Aurora explosion for a long time. There will be no worrying about reaching home. Hence, it will be surely a wonderful experience. Never worry as dinner facility is also available. To enjoy a suitable activity holiday this summer, plan for a trip to Abisko village in Sweden and feel the experience.
