Car DVD player - What is the difference between 1 DIN or 2 DIN

In automotive aftermarket, car DVD player may be one of the most popular car electronics among car owners. More and more people have already changed a new car DVD player just for fun, and some are thinking to replace the previous one. In the old cars, there are usually the radios only, but obviously it's not enough for the modern citizens. Usually car DVD player has has two Basic Universal Sizes: the 1 Din size and the 2 Din Size. But What is the difference between 1 DIN and 2 DIN car DVD players?

In fact, it could well be an essential question to ask before spending a large amount of money to get a car DVD installed in the car. However for some people, they are unsure of what DIN means exactly.

A DIN is the standard measurement for car stereos. 2 DIN is also a standard size for car stereos with specific measurements. The term DIN was originated from a German organization named Deutsches Institut fur Normung. Later on, the ISO or International Standard Organization adapted the term DIN to signify the standard measurement for car stereos. And it is commonly referred to as the "DIN car radio size".

So translated literally, 1 DIN is the standard DIN specification, 2 DIN or double DIN refers to units that are twice as high as the standard DIN. So you don't need to worry about it.

Car DVD player generally come in either 1 DIN, which is 50 mm high, or 2 DIN, which is 100 mm high. So you should check the stereo player position height of your car carefully. If 50mm, you should get 1 Din Car audio, and if 100mm, please choose 2 Din car stereo.

1 Din Car DVD player has various sizes from 4.3 inch to 7 inch. They are space-saving. In fact, the screen can be folded, if people need to use it, just pull it out. It is very convenient, and also can protect the LCD screen from wear. The size of the monitors can be different, and it's usually between four to six inches, but if people want it to be used in many aspects, like showing photos, playing videos, and showing the view of the camera, in that case, the screen should be larger, and it should be at least seven inches. Moreover, the GPS navigation system is also including in the 1 din DVD player.

2 Din car DVD player is the most popular car stereo in the market today. This car DVD player lean toward the higher end of Mobile digital video technology while driving your car. Double DIN are becoming increasingly popular as it has a lot of features that a normal radio can't provide. Many 2 DIN car DVD player can play DVD, serve as GPS navigation or digital television and etc. In some way, it can also beautify car interior environment, and offer a nice visual effect.

Regardless of whether you are looking for a 1 DIN or 2 DIN car DVD player, autodvdgps has the model you need. Click here to learn about more car DVD players.
