Things you have to do before starting to use Online Shopping Cart by Farooq Khan

Article published on December 30th 2011 | E-Commerce

An online shopping cart is known as shopping cart software, that permits customers to show their products and keep tracking the and at the same time running them. As we know customers are searching the online stores they might come across products which they want. They can simply push a button which says simply along product lines "add to cart" or "add to shopping cart" and that item goes to their virtual shopping cart or purchase order. They can as much products to their cart as much allowed by merchant's shopping cart software allowing.

You know the best part of online shopping cart is that allows the customers to track their total all the time during shop. And, if you are using advanced shopping cart software it will also show shipping cost or estimated taxes side by side. This function is very helpful for customers because it is allowing them to alter their order side by side. Latest hosted shopping carts also have the option o save the customers' shipping information so that they will not need to enter their details in future. This is really helpful to customers as well as it can help customers like they want to come back to you.

Important points need to be considered with online shopping carts:

Shopping Cart Compatibility: If you really want to offer an affiliate program to use, so you can get traffic from other sites, blogs, etc. And you can offer them commission on per sale basis. But remember not every shopping cart software or template allows this integration. Credit card compatibility is very important, so you should be careful in this.

Other Customers: Lots of hosted shopping cart or usual shopping cart companies will have long lists of sample customers. It can help you in our decision making process because of many important reasons.

You can find out how shopping cart functions "LIVE".

Do you like its looks, loading and transaction speed - although all this depends on server they are using, graphics, scripts and some other things that might slow down site.

Interact with shopping cart company's existing customers and enquire how success the shopping art company is? You should try to assure that company has many customers because itâ€™s very important for you to choose an established shopping cart company.

Check Demo: Before buying shopping cart you need to verify their demo shopping cart first. You need to make sure how easy to log in, make changes, and products and download orders and get reports. Never purchase a cart without seeing it live.

Features: Did you receive any email when you place order? Does the customer get a timely email? Is it integrated with reputed shipping companies? Does it allow for state-by-state sales tax? Enlist all those things you want in your shopping cart.

Live Support: ask shopping cart company about live support because mostly companies offer email store but now you need live support such as live chat or phone or voice chat etc.
