Article published on April 16th 2012 | Education

Android phone are latest category of the mobile phone in India nowadays, and youth is loving this new revolution in the mobile phone market. Android phone applications are best till the date. Youngsters are going for android phone only, because these android phone comes with multiple number of applications like gaming, chatting, facebook, twitter etc. Moreover, these android phones are very user friendly i.e. applications are easily accessible on android phones as compared to other mobile phones. As with other phone, to access applications is a time taking process as other phones are as advanced as android phone are. Android phone are not only offering gaming, chatting, social networking application but also providing out of the box applications like Instagram(latest photo sharing site), Google map, Talking tom, Pattern authentication etc, which are not available in other phone.

Android market in India, is very tough in the present times. Leading mobile development companies are making their best possible efforts for launching much more advanced android phones and application in order to beat the market competition. Every mobile company is looking for talented professionals for the android development profile in their companies. Salary is not an issue for well deserving android professionals in the market in the present times.Experienced android professinals are getting whatever they are asking, because every mobile company is wanting to establish their company's name as a brand name in the android market.

Android developers are in great demand all over the country. But, somehow companies are avoiding to hire fresher's for this profile. This is because android market is in a rapid changing phase, new android applications are being launched in much shorter period. So companies are willing to hire professional who can staring working on the android project soon after joining. The only way for grabbing these android job opportunities is to get trained in an I.T company which also provides training on android other then android development. The main benefit which students get from these training companies is students get corporate experience as well as technological experience too. After completing industrial training in these training companies, students learns almost every possible aspect which a professional must have to work in the corporate sector as a android developer and are believed to be industry ready android professionals.

Android training has become need of the hour in the present scenario especially for fresher's b.tech and mca because engineering and mca students are the first priority of the companies for their job for android developers. Mobile development sector is a all new concept in the I.T market nowadays and is booming day by day. Mobile development sector is having a great future ahead and is going to be the major source of employment especially for I.T professionals. Android is a very new concept and is a field where professionals can grow at regular interval of time. Students who are willing to build their career in mobile development sector must go for android training.

Top android training companies are located in noida, as noida is having maximum number of I.T companies. Noida is the most popular place to learn android among students.
