Article published on June 15th 2012 | Education

Fast paced competitive world demand competitive certification that may assist you survives and thrives higher. IT Certification like (CompTIA Certification, Microsoft certification, cisco certification, sun-java, apple etc) not solely grooms you physically, mentally and professionally as well as prepares you to face the IT industry.

Reasons To Earn A Comptia Certification,/u>:-

CompTIA certifications are the superb choice for those hungers for a good career and want to earn a good salary. CompTIA Certifications offers further professional advantages like business recognition of the certified person's experience and knowledge in IT. Following reasons explain you to why to be comptia certified:-

1. Best Career opportunity: - Lot of career opportunities and advancement opportunities continue to emerge every day in IT field. Certification shows that workers are motivated and well skilled in their fields. Employers are additional feasible to serious consideration to candidates who have passed certification exams although they lack experience. In fact, several corporations need certification to even apply for a job. CompTIA certification is additionally advantageous to job seekers because the content of the exams is wide. This sets CompTIA aside from certifications like Microsoft or Cisco that solely prepare professionals for that specific software.

The type of job is based on certification you earn for example:

CompTIA A+: Computer technician, technical support, help desk specialist or service technician.

CompTIA Security+: network security engineer, Security specialist or analyst or many other positions.

CompTIA Network+: network technician or engineer, Junior level network administrator.

2. Get a better salary: - Certified persons earn between 5 to 15 percent more over non-certified persons. Obtaining certification ads more value to every employee and save the company cash on training and support services.

3. Vendor-neutral IT Certification: - CompTIA certifications are universally accepted not only in US but around the world. In contrast to alternative certification organizations that come back and go, CompTIA has been around for nearly thirty years. CompTIA build a reputation within the IT field, and by getting a certification from them, you'll be able to benefits from their reputation. Because of its strong business presence in IT, a CompTIA certification can serve you well despite where your career takes you.

4. Reputation in workplace: - When an organization has workers who are certified, they give the impression of being higher. Having knowledgeable workers will increase client satisfaction and profits. Having skilled staff will increase productivity and lowers the cost of training new workers. Limiting new hires to solely people who are certified simplifies the recruiting method and provides the corporate with tangible competency standards. Recognizing these facts, several corporationsâ€™ need that workers be certified or get certified at intervals a precise quantity of time from the hire date.
