Article published on May 3rd 2012 | Education

Being a white hacker is not enough to prove in the computer industry that youâ€™re knowledge in hacking has a good intension there are facts that needs to be considered and one of those things is computer ethics, for those who are not technical person letâ€™s elaborate more and give a further explanation to understand what is a computer ethics and know about Certified Ethical hacker. Just like in bible if there is a ten commandments there is also a Ten Commandments came from computer ethics institute and these are the following exactly as the institute created:

1. Thou shalt not use a computer to harm other people.

2. Thou shalt not interfere with other peopleâ€™s computer work

3. Thou shalt not snoop around in other people's computer files.

4. Thou shalt not use a computer to steal.

5. Thou shalt not use a computer to bear false witness.

6. Thou shalt not copy or use proprietary software for which you have not paid.

7. Thou shalt not use other people's computer resources without authorization or proper compensation.

8. Thou shalt not appropriate other people's intellectual output.

9. Thou shalt think about the social consequences of the program you are writing or the system you are designing.

10. Thou shalt always use a computer in ways that ensure consideration and respect for your fellow humans.

As the ten computer ethics commandments stated from above the Computer Security Institute gives training and information to support information security with the professionals those are some facts in computer ethics.

Now what are the requirements to become a certified ethical hacker (ceh) First thing you will do is to fully understand the code of ethics and if you do, the next thing is to have a certification exam in International Council of E-Commerce Consultants (EC- Council) in this council there are three process in order to obtain the certification, first is the certification course work that has a 19 modules 7 version of course work and has two options to study Instructor-led training and Self-Study only countries have training centers Universities in Asia, Europe and US. When you are well prepared you will take now the Examination, the examiner must have two years of experience in network security but if the examiner does not have any two yearsâ€™ experience he or she must submit any educational background that gives any consideration on any case basis the exam cost $500 for version 7 and $250 for version 6 but take note that is a US basis if you will take in other country the prices may differ.

In this article weâ€™ve conclude that obtaining a knowledge in hacking must be used in a good side and if you want to use that special ability to earn money, you have to take a Professional Certification to

become a Certified Ethical Hacker in the field of information and technology once you have earned those thing thatâ€™s the time you will be considered as a White hacker in the company or in the industry.
