First step:

Pre-writing procedure:

There is much to do before actually commencing theme essay writing, if a student want to come up with an organized version of essay writing then he has to prepare an outline that will draw out the boundaries to discuss the ideas and arguments. Most of the student thinks that crafting an outline is a mere waste of time then they should realize the importance of organization, order and coherent system of a theme essay. Furthermore, it will also save a lot of your time because you donâ€™t have to think what to eliminate and what to incorporate.

Second step:

The introduction has to be effective and complete; this is only possible when you know the overall components of an introduction which are:

Each paragraph must be dealing with a single idea that will begin with a topic sentence supporting the thesis statement and idea, argument followed by the evidences, proofs and examples to prove your ideaâ€™s credibility.

Fourth step:

Writing the conclusion:

Get back to the thematic essay purpose that is the thesis statement, illustrate it again in the conclusion along with the important points that you discussed so far in the essay on theme. Make sure you are writing the conclusion in a single paragraph of about four to five lines depending on the word count prescribed by your college or university. Also, you can provide your own viewpoint about the topic of theme essay in the end and as you will writing something about yourself then you can provide a simple viewpoint on why did that particular thing happened in your life or now what have you learned so far from your experiences. Remember, not to include anything new in the conclusion for it will confuse the reader about your objective and it will look stupid as well.
