Kingsland Residents Consider an HVAC Career by William Hauselberg

Article published on February 14th 2012 | Education

Heating, air conditioning and refrigeration mechanics and installers work in one of the fastest-growing occupations in the United States, according to the U.S. Bureau of Labor Statistics. Between 2008 and 2018, the occupation is expected to grow by 28 percent, which is much faster than the average for all occupations. If you are interested in an HVAC tech career Kingsland is just the place to begin your training and job search.

What HVAC Technicians Earn

The hourly average salary of an HVAC mechanic or installer in the U.S. was $21.57, according to the Bureau of Labor Statistics as of May 2010. The average annual salary was $44,860. The salary range on the low end, in the tenth percentile, was $26,490 per year, or $12.74 per hour, and it was $66,930 per year, or $32.18 per hour, in the 90th percentile.

HVAC Technician Education

When you are ready to start your HVAC career Kingsland offers several employers who would likely hire you. First, you must complete your education in HVAC. Community and vocational colleges often offer HVAC certification and associate degree options. While the Kingsland campus of the College of Coastal Georgia does not offer such a training program, there are many training options in and near Kingsland. Altahama Technical College-Camden Campus in Kingsland is one place to complete your HVAC training. You might also receive on-the-job training from some employers.

What the Job Entails

If you want to work in an HVAC tech career Kingsland employers and those in surrounding cities need you. As an HVAC technician, you will work on and install compressors, pumps, fans, thermostats, switches, pipes and motors in commercial and residential buildings. Many HVAC technicians specialize in either installation or repair. In your training, you will learn to do both, however.

The work is often seasonal, meaning that there may be some weeks of the year where you work fewer hours than usual. This can cause some financial strain, but with planning, you can save ahead for the times you know the work is likely to be slow.

Technicians perform maintenance on air conditioning and heating systems throughout the year, and they are trained to sell them to customers as well. The work is physically demanding, and it provides many challenges and problem-solving opportunities.

When you want to start down a new, exciting path of an HVAC career Kingsland offers training and employment opportunities that you might not expect. This high-growth industry is in need of trained, skilled and experienced HVAC installers and mechanics, and it needs them right in Kingsland, Georgia.
