Learn English Online for Free by Shanky Paul

Article published on December 2nd 2011 | Education

There are more English speaking people in other countries than in the United Kingdom, the country of the languageâ€™s origin. It has de facto assumed the language of the Internet and the online community. The roman script adopted by the English language and grammar of English have become the language of the proactive online community. Many words of the language have percolated the local cultures and so has the language incorporated chutney of words into its vocabulary and dictionary.

The language of English is no more the Englishmenâ€™s preserve. The language is the repository of all modern scientific and technological knowledge. It has become the language of discussion of all emerging technologies. Most developing ideas today are recorded in the language. People who express their ideas in various other languages engage translators to translate their expressions in English for wider publicity and for wider readership. Similarly more and more English language literature translations are available in across many other languages. Again English language translations are translated by others to their languages. Thus English language along with becoming a bridge for building global commerce is also becoming a link language for literature trying to understand other cultures and people.
