Learn SAP BI Training at Online from your home by David_johnson

Article published on July 4th 2012 | Education

There are various types of SAP courses for business professional and IT experts, and SAP BI training is one of them. BI stands for Business Intelligence and previously it was known as BIW training. BI training is one of the most resourceful SAP training and people all over the world have started taking interest in it.

When you complete a SAP certified course, you get better job opportunities. Most of the Fortune 500 companies use SAP ERP software to manage data, and they always look for SAP experts to maximize their productivity. When you complete SAP BI training, you can easily manage large databases and data management software.

You can obtain SAP BI online training in different ways. If you have enough time, then you can opt for traditional "in-class training" and if you stay at a remote location, then you can go for online training. There are some advantages and disadvantages in both these training methods. When you visit classes regularly, you study with other students and can discuss your problems with your teachers directly. However, if you are already working in a company, then you have to take leave to go to classes. On the other hand, when you study SAP BI online, you can do it from your home, but you miss the class environment.

Some people don't like any one of the aforementioned options and they completely depend on study materials and resources. This may not be the ideal learning process, but it's certainly the most cost effective option.

A standard SAP BI training course duration is roughly around 80 hours in total. You can learn SAP BI from any SAP training Hyderabad institute. These 80 hours is divided amongst week days and weekends. However, the class duration can be different in weekdays and weekends. As the training progresses, the class hours increase, so that you can comprehend the complexity of business intelligence comfortably. However, generally, every institution talks with the students separately to accommodate their class hours.

There is no need to be a web programming expert to understand SAP, but if you have MBA, ACCA, CA, or CMA degree, then you may grasp the SAP topics faster than other students. It is true that that a SAP BI trainer primarily teaches topics included in the BI module. However, you should be open to learning some related topics such as ASAP (Accelerated SAP) and ALE (Application Link Enabling). You should know about these topics since they are closely related to SAP BI.

SAP BI training online covers a number of topics and you will learn them one by one during your course period. First of all, your teacher will give you a case study that works like a real life simulation of SAP BI. This case study will help you learn the actual functionalities of SAP. Then, you will learn OLAP terminologies like Business Content Objects, ERP, ETL, Analysis, Cubes, Multi provider, ODS and other features. In next phase, you will get hands on experience in Transaction coding, system backdrop, business packets, Metadata Repository and several other related features. In the final stage, you will learn Metadata and the process of downloading BI features
