Live Project Based Training is All You Need. by Ashutosh Kaushik

Article published on December 12th 2011 | Education

In the present market scenario, to get a job at fresher level is a very tough job. The main reason behind this bottleneck situation is excessive number of freshers in the market now a days. As a result top companies and MNC's are appointing cream freshers candidates for their entry level job, and majority of the other average candidates are left behind. And the remaining companies want well skilled candidates for their job, the candidates who can come and start working immediately. Moreover, majority of the technical graduates are not as much technical strong increased number of engineering colleges has lowered the quality of technical education.

This choking stituation is resulting in unemployment of technical graduates, and hence creating frustration in the freshers engineers and technical graduates. The only way out from this situation is to have sound technical knowledge of any domain, as there are plenty of technical jobs in the market but only for technically strong candidates. As, in in present market scenario company expect candidates to soo technically strong that they can handle multiple functionaing of the company. As after recession hit, the company revenue has decreased at a very rapid pace. And companies are now not in a condition of investing large amount of capital in the training programs of fresher level candidates.

Sound technical training is the key to get entry level job in the top companies and MNC's. The students willing to gain technical knowledge on their respective domain for a reasonable job can go for technical training programs. Live project based training is the most popular of these training programs now a days for technical students.This live project based training give students chance to learn technology on the industry norms. Moreover this live project based training programs gives students the maximum exposure to become industry ready professional. The curriculum of this live project based training programs is designed is such a manner the students get ample of time to learn and master the technology. During this live project based training programs students get to know more about real time situation which professional faces during project development. They learn how to take things in the company, how to overcome real time problem, how to trouble shoot thing and never the less they learn to be a professional.

But the major problem which students are facing these days is for where to get this qaulity live project based training.As there are many training training organizations in India which promises to provide best live project based training. But there are only few top IT And Embedded Training Organiation which provides quality live project based training. These training organization provides live project to students for better understanding as well provide life time assistance in which students can come for their queries even after completion of the training programs. Moreover these top training companies conducts special query sessions in between training programs for crystal clear understanding of students.

Students should definately go for these top IT & Embedded training Companies for their live project based training programs for a strong technical foundation for a happy and save tomorrow.
