Article published on February 27th 2012 | Education

â€œA liberal education is at the heart of a civil society, and at the heart of a liberal education is the act of teaching â€œ-A. Bartlett Giamatti. Education is the most required thing these days. The motive of Education is to teach, improve and make the children socially and physically strong. Education makes the child understand the depth of the world so that it becomes easy for them to judge what is good and bad. Just to be a good performer one has to show a dedication towards the work in order to achieve a certain standard. When a child is born since the parents become busy planning for the school which would be suitable for their kids.

Parents are more concerned about their kids for acquiring good education so that they can secure a good future and lead a contented life. When we compare the present literacy rate with the past year then the difference would be like hell and heaven. When children enter a preschool or nursery at the age of two they start their education from kindergarten just to make their basic foundation to learning strong and to get a hang of the school environment. In preschool, a kindergartener learns the basic things such as counting, measuring, sorting, and number operations and is able to grasp the things very quickly.

Learning through the pay way method gives them a direction for their further education and leads them on the right path. By practicing at home as well as in the classroom, the childâ€™s confidence level gets enhanced and their ability to meet the challenges becomes stronger. Till the admission of the kids is complete, things are fine but the problem arises when we talk about the fees. The charges for the nursery school are increasing day by day due to which the parents are really worried. Most of them land up paying high amounts from their salary just to make their kidâ€™s life secure.

After the survey it has been found that the cost of nursery schools in Scotland has increased by 6.3 per cent while the price in Wales soared by 6.8 per cent. According to the study, the most expensive Nursery school was in London, where the average family paid Â£22,100 for nurseries over the course of the year. The fees were equal to the most costly private day school fees in England.

There is one alternative to deal with this circumstance of hike in nursery fees. A financial plan can help the parents save money for the right school. It is a plan that helps them to manage their future income and savings. Before admitting their child into a school the parents should keep in their mind that what their budget is and how they are going to manage all the expenses of the family. Parents should make financial plan in advance for kidâ€™s education. However, these days, many of the schools provide education scholarships, education grants and education loan by bank for the education of kidâ€™s in better school.
