Article published on December 14th 2011 | Education

Since self-government and even before that era, the significance of education is very much obvious in India. It can be said that many people used to mass abroad universities like Harvard and Cambridge and make a niche for themselves instantaneously.

Long-lasting the same roots, let's see the major roots which used to and still make such laureates.

Yes, it's none other than the education arrangement of schools in India which is the real the root cause for influence and intensification the students as far as their future growth in the field of education is anxious.

Let's go to the basics and track out the structure of schools India follows

There are primarily four basic stages of schools in India, primary, upper primary, secondary and higher secondary or the high school.

Overall on a common, the schooling continues in India for 12 years from class 1 to class 12th (10+2).

The government in India is dedicated for providing the basic education for all (Primary and upper primary) aged between 6-14 years of age.

Though, upper primary and secondary school learners old eleven to fifteen are planned into classes six through ten, and higher secondary school students ages sixteen through seventeen are enrolling in lessons eleven through twelve. In some places there is a notion called middle/upper primary schools for class six to eight.

Higher Education in India provides an instance to focus in a field and includes technical schools (such as the Indian Institutes of Technology), colleges, and universities.

The core types of schools prohibited in India are

â€¢ The state government controlled schools under which a large amount of students are enrolled

â€¢ The Central Board of Secondary Education (CBSE), New Delhi

â€¢ The Council for Indian School Certificate Examinations (ICSE), New Delhi

â€¢ National Open School

â€¢ International Schools

Now, let's have a full look at each of the stages of education In India school scenario

* Preliminary Education- in India, the concept of preliminary education dates back to history pages and itâ€™s not a fundamental right of the students, with a very less fraction of them in receipt of education under the forum worried.

Naturally, the students under the same are LKG, UKG, students aged between 2-1/2 and 3.

Though, the facilities under this part were not better until some famous players entered the scene. Essential amongst are Kid zee schools, Shamrock preschools. But, these good talent provider envelop a very few small chunk of population.

On the other hand, the amount of students enrolling for preliminary education program in India is as low as 11.22%!

Residential schools- In order to make the students a refined individual in the ensuing future, the residential schools play a essential role in the same department of impart valued education in India. Though, the basic tip for enrollment in these schools shall be for parents that they send their ward only when they attained a standard age, adequate to live alone and separately.
