Article published on December 21st 2011 | Education

Entrance exams are the order of the day nowadays with almost every kind of job recruitment and college education requiring the aspiring candidates to appear in a qualifying test. A number of such exams are being conducted every year for various jobs and college admissions. Many of the jobs that are available for citizens of India are possible through the entrance exams and interviews conducted by the Union Public Service Commission and these are mostly of the officer ranks.

NDA exam is one of these tests that are conducted by the UPSC so that the successful candidates are admitted into the National Defence Academy, where they get training and education to become officers in the armed forces of India. The institute, the course and the posting as officers in the armed forces are very much sought after by people who are interested to serve in the armed forces.

Recruitment in the armed forces through the NDA exam is a very prestigious achievement for the candidates because they will be a part of the elite group of officers in the Indian Army, Navy and Air Force. Any student, who is passing out from the schools and completing his education from 10+2 with science stream, can now dream of becoming an officer in the armed forces by appearing in the upcoming NDA 2012 exam.

For the army recruitment, the candidates should have passed the 10+2 level with any subject while physics and mathematics is compulsory for Naval and Air Force. If this is the criteria, the students should take up physics and mathematics in their 12th class and be prepared with the necessary marks in the exam, which is usually 55% for general candidates.

Interested candidates should go through the prospectus of NDA 2012 in order to know about the eligibility criteria related to the marks secured. Then, the students should go through the syllabus of the entrance exam, so that they are able to cover all the topics from which the questions are asked.

Since, most of the question patterns are from the 10+2 subjects, students should take care to complete their 12th standard courses with details and also go for appearing in a number of mock tests. This will allow the students to fine tune their knowledge and will be able to give them an idea about the time frame of answering the questions. As soon as the prospectus and application forms are sold for NDA 2012, the interested candidates should go for reading the details in the prospectus. This will allow the aspirants to be conversant with various rules and regulations regarding the filling up of application forms and also will help people in knowing the question pattern.

People should also keep their eyes and ears open about any pertinent changes that might be declared by the UPSC related to the NDA 2012. These might be helpful in scoring better and preparing with excellence for the entrance exam. The recruitment into armed forces and then the postings as officers is one of the best kinds of jobs that people find in the country, due to which thousands of students are seeking the NDA 2012 for a dedicated career.
