Summer Training for Proper Project Assistance by Ashutosh Kaushik

Article published on January 21st 2012 | Education

Because different IT and core companies works on different technologies, which are not usually tought to students during their B.Tech, MCA or any other technical graduation. Students get to know about these technolgies while their internship period when they assist their seniors during working on project given to them to work upon by companies. In fact, top companies do not expect students to be so much substantial technology wise, these companies just consider the basic technological background of students i.e. Companies require students with solid basic technical knowledge, fast learning quality, good interpersonal attainments etc.

In fact most of the gaint IT and core companies do not belives in recruiting topper or outstanding students, these organization usually looks for candidate with crystal clear fundamentals and sharp IQ. For their placement and recruitment processes these companies follows some simple step like Aptitude Test for checking the IQ of the candidate, HR round for analysing personal qualities of an individual and then the most importantly Technical round during which technical fundamental knowledge of students are checked. This is the main phase of recruitment procedure because the students are being recruited for technical job, so company expects students to have strong and clear technical fundamentals. Final year project is the favourite topics of these companies to check technical well being of candidates. Because final year projects are basically software or any device based on different technologies accordingly, and recruiter can easily put some good technical question to students to check their caliber. And only students with good technical attainment can crack these technical rounds.

But in fact, majority of the students fails to clear these technical sessions and misses golden chance to get placed in their respective dream companies because they do not have basic knowledge of their respective technology. The main reason behind this is, the teachers which assist students during their project work, they themselves do not have basic knowledge. So how they can guide students on their projects.

The best way to get clear and solid technical knowledge is to take your summer training seriously. Because summer training is the best opportunity for students to learn technical fundamental while working practically on project based on their technology. Because its always easy to learn anything while working practically on it.

If done properly properly summer training fulfill all the basic need which are required by students to get placements. There are few standard training which not only provides training to students but deal in development and placement services which provides proper placement assistance services to students while their project development. During these project assitance services trainers and experts assisting students for their project encounters students queries on regular basis to clear their doubts and basic knowledge. These assistance services are special designed to develop Quality Professional for IT and core sector.

Summer training 2012 is approaching and will be available from first week of May in top development companies. Its high time and a now or never situation for technical students to make their mind to take their summer training very seriously.
