Tamin Kim â€“ a Reputed Professor of Mechanical Physics

By Colbert Raynard

Article published on May 8th 2012 | Education

Tamin Kim is a well-qualified and experienced professor of Mechanical Physics. He completed his education from reputed institutions of New York city. During his school time, he was a brilliant in studies. He participated in many science competitions and exhibitions and won awards many times. From the childhood, he had keen interest in machines. After completing his schooling, he joined an engineering college in New York and obtained engineering degree in Mechanics. He also has done masters in Mechanical Physics.

Tamin Kim comes from a highly educated family. There are five members in his family including his mother, wife and two sons. He also has a younger brother who lives in Los Angeles with his family. His father Tamin Theodore Kim was an English Lecturer in a college in New York and died when Tamin Kim was just 17 years old. After father's death, he took the responsibility of his family. While studying, he ran a gift shop after the college hours. His mother also taught in a school. When he passed out from the school, he had the only aim to obtain an engineering degree from a reputed institute of New York. But his family was not in a position to fulfill the financial requirements for his engineering degree. Then his father's friend Andrew Uhm helped him and guided him to run a gift shop along with his degree.

Tamin Kim struggled a lot during his young age, but he never stepped back from any difficult situations that he faced in life. After completing his education, he served as a Lecturer in Mechanical Physics in an engineering college. He has a wealth of knowledge in this subject and after five years of lectureship, he was promoted to Professor of Mechanical Physics. He got life time achievement award for his outstanding dedication in his subject. He makes many researches on classical mechanics and electromagnetism. The college management and the United States government awarded him.
