Article published on February 17th 2012 | Education

â€œWe wake up, we think whatâ€™s next. The day ends, we think whatâ€™s nextâ€•, but what about tho children who do not even have the ability to think. We hardly think about such kids. If a man is physically fit, the individual will be mentally strong too. Physical fitness walks parallel with the mental state of a person. We wait eagerly for the sports week of our schools and also enjoy our victory.

However, unfortunately we hardly think about those kids. Even they see the similar dream but canâ€™t accomplish them as their bodies do not permit them to get involved in anything of that sort.

Physical disability is any injury which restricts the physical function of limbs or fine or gross motor ability. Other types of disabilities include Sensory disability, Intellectual disability, mental health and emotional disabilities, Developmental disability, etc. Disability, be it physical or mental may be present from birth or occur if the person undergoes any kind of trauma.

To overcome disability in human beings assistive technology is used which is a common term for modifications and devices. Prosthesis is in use from about 1800 BC and the wheel chair is from the 17th century. Other examples of assistive technology are text telephones, standing frames, Braille & speech recognition computer software, large print, etc. The LOMAK keyboard is one of the examples which was designed in New Zealand especially for the disabled people. The Free and Open Source alternative Orca, Voice Finger, Freedom Scientificsâ€™ JAWS, SmartboxAT's The Grid, etc. are some of the hardware and software that have been designed only for disabled people. Whereas, there are other software and hardware that are not designed only for the disabled people but can be used to increase ease of understanding. One of the examples is Nuance's Dragon NaturallySpeaking.

Physically handicapped children get the same education in schools as other children get. This category of children are educated and trained in a different way from that of the normal children. Their syllabuses are different from the syllabus of normal schools and include etiquettes, self-dependence, everyday activities, conversation, etc. There are schools available in every town and city for the disabled children. Every child in those schools is paid special attention by the teachers. Therefore, parents of those children can stay without any tension because the schools also take equal initiative to improve their conditions.

Thus, if you are looking for a school to admit you kid, that teaches other disciplines as well as provide a friendly teaching to the kids. Then, Onlineschooladmissions is the appropriate zone for you. Onlineschooladmissions is a site that introduces you to numerous schools and helps you to find a perfect school for your kids that will prove to be beneficial for them and can also get the chance to learn a number of other disciplines. An online admission agent, we do everything for you right from giving you a choice of schools in India through our online school directory to scheduling an interview for your child from a number of schools. Admissions couldnâ€™t get easier, but then, thatâ€™ because OSA understands parental woes that crop up during admission and is dedicated to ease the load off your shoulders.
