Article published on May 8th 2012 | Email Marketing

Even though we all dream of being our own boss one day, it has to be said that the idea can be a little daunting. What if we make mistakes? Thereâ€™s less of a support structure to help you out if you fumble an important job in your own business, after all. Thatâ€™s why a WSI franchise is a good choice for your transition from employed to self-employed â€“ we make sure the process is easy to understand and readily accessible.

Training

We provide each WSI franchise owner with the training they need, just like they would receive in a traditional employment situation. Our 90 day quick start course is easy to understand, can be taken either on its own or on the side during a regular job as you prepare to make the switch. Either way, you learn the skills you need to run your franchise, with nothing hidden.

A Proven Approach

The WSI method has worked for hundreds of WSI franchisees since we entered the digital marketing game in 1995. We consistently update the specifics, but our core approach remains the same and provides a strong foundation for you to set out and bring in the revenue you expect out of a personal business.

Mentoring

Some training inevitably has to take place on the job, of course. Even with the quick start program and the proven method we provide, some situations will come up that surprise anyone. Thatâ€™s why we have our mentoring program, so experienced franchisees can share their insights and ideas with new entrepreneurs eager to do things right.

Support As You Need It

A franchisee can always contact the home office for support as needed. Further, we have easily accessible programs such as training webinars, regional training workshops, and monthly open forums with Ron McArthur, President of WSI. Each of these can be contacted or used as much or as little as the franchisee decides is important, leaving the control in your hands to do business your way.
