Article published on March 26th 2012 | Entertainment

Bored of playing those age-old kidsâ€™ games? Do you want something exciting and adventurous to play with your friends? Then laser tag is definitely the game meant for you. Completely entertaining and safe, this can easily be played both indoors and outdoors. This game is a recreational activity where players attempt to score points by tagging targets with a hand-held infrared emitting targeting device. Each player of the team wears an infrared sensitive target which is sometimes integrated within the playing arena.

This game is completely harmless as it does not use any physical projectiles. The laser tag systems typically use infra-red signaling to track firing of the laser. In order to provide the game a realistic effect, while playing indoors, a visible laser combined with theatrical fog is used. The infra-red signals sent by the laser when fired are encoded with information like the pack identity from where it originated. This coding allows for scoring and may also discourage interference from any unauthorized device in the playing area. Fully entertaining and meant for all age groups, this game has opened up new avenues in the laser tag sports.

This game promotes team-building skills and is ideal for corporations, school groups and youth groups. Wide open outdoor fields allow teams to formulate and engage in specific strategies while the indoor arena provides their own unique set of challenges thus encouraging the team members to work together and lead the team to final victory..

If the outdoor weather conditions are not suitable for your endeavors, then you can simply shift the venue indoors. If you are looking for a game which promotes team-building skills and is also entertaining and thrilling, then laser tag is an ideal choice. Perfect to be played in a team, this game can be enjoyed anywhere and at any moment of time.
