The Preview of the Guild Wars 2 Beta by Caolinyan

Article published on August 21st 2012 | Entertainment

I'm going to tell you some news about the Guild War 2 Hands-On beta in these days and I do think this is quite essential for you in your gameplay. I know you need to get the full preparation before its release, so Iâ€™d like to mention again that the Guild War 2 Gold is always the most important thing for you all.

The first Guild Wars 2 open beta concluded on Sunday after a solid sixty hours of almost entirely uninterrupted service for thousands of gamers all over the world. The servers were packed, bugs were found and squashed, and many gamers made their case for how fantastic or how disappointing the long-awaited MMO had turned out to be after years of waiting.

It is important for any GW2 Gold players to keep in mind that GW2 Gold is a complete overhaul of the original game. Very little was maintained in terms of combat, instancing, and even moving around the world (i.e. jumping!). The connections are mostly cosmetic or lore-based, but despite all the differences, the world itself feels familiar.

Tyria has gone through many changes in the centuries since Eye of the North, but the atmosphere of that world remains mostly unmolested, thanks to the programmers and especially the incredible art team. Tyria itself is a work of art. I could not stop taking screenshots at every juncture, whether it was the desolate beauty of the Shiverpeak Mountains or the grandeur of Divinityâ€™s Reach, the human city.

This is the end of todayâ€™s article and I think you may read it more carefully and learn them by heart to use it into your gameplay. Besides, I want to tell you again that the Cheap GW2 Gold is the most important thing for you for your gameplay. Hope you have a nice time!
