When we speak about water filter, it is not one but various mechanisms that catch our attention. Which mechanism will suit your water type all depends on the tap water test you conduct. A sample can be sent to the nearest lab for the same. Knowing and then buying the water filter with the right purification mechanism matters. Just as when you fall ill, you get yourself diagnosed by the doctor and then the right medicines or treatment is provided, likewise your tap water needs the right treatment. Over 2100 harmful contaminants are known to be present in water varying from place to place direct consumption of which will only cause diseases.

It is Eureka Forbes water purifiers that millions of users across India rely on. Of course you will come across other brands and countless water filter models in the market. The reasons why the Eureka Forbes water filter is a household name are many. It is a blend of innovation, groundbreaking technology incorporated, superlative quality substantiated by international quality certifications, and purification effectiveness. And then users of Eureka Forbes water purifiers users never complain when it comes to receiving service support. The company is always one step ahead to provide prompt service support. There are two brands of the Eureka Forbes water filter. One is the AquaSure, available at all leading consumer durable, home appliance and modern organized retail outlets. You can view the complete range of AquaSure Eureka Forbes water purifiers at eurekaforbes.com.

One purification mechanism worth mentioning here is the use of ultraviolet or UV, which is an internationally used technology. Ultraviolet rays have been proven to have the property of inactivating disease-causing bacteria and virus and other micro organisms. AquaSure UV Eureka Forbes water filter comes incorporated with not only the UV lamp but also adequate pre-treatment facilities like a pre-filter and an activated carbon chamber so that it becomes more effective to remove physical and organic impurities. Water that flows from the faucet is physically, organically and microbiologically pure. And then AquaSure UV Eureka Forbes water filter also comes with a monitoring system so that quality of output water is continuously monitored. In case any error occurs or if any of the cartridge is not functioning well or if the cartridge life is over, the filter shuts off automatically. In short, the water filter stops working if purification levels drop below pre-determined standards. Then it is time to seek service support. Eureka Forbes has 1500 plus service centres across the country to cater to service requests. Over 5800 trained technicians are always on their toes to attend to consumers. Users of Eureka Forbes water purifiers thus gain a competitive advantage always.

There are numerous AquaSure UV Eureka Forbes water purifiers to choose from. They differ in terms of storage capacities, technical specifications, and features. These are AquaSure Crystal, AquaSure Elite UV, AquaSure Smart UV, and AquaSure Aquaflow Dx. Each water filter is a true archetype of technology and quality.
