Benefits of Tables Pliantes Sur Treteaux by [Julia Roger](#)

Article published on July 23rd 2012 | [Family](#)

Tables sur treteaux is the French term for Trestle. Trestle tables normally have large horizontal structure that rests on only two legs spreading beneath. As there are no more supportive pieces beneath the table, more space is available. They are ideal for big dinner parties. The finest tables sur treteaux items are made from hardwood materials like teak, mahogany and pine. As a result, price is also higher. An amazing feature about trestle tables is that they are expandable. The tabletop features a recessed, hidden area which can be used for storing some additional items.

Trestle tables are often called TABLE BOARD & FRAME. They are probably the oldest form of tables used till date in Northern America and European countries. As far the knowledge, these items were used first by European royals during the early part of 14th century. These days, Trestle folding tables are available in wide variants. Actually, tables pliantes (French name for folding tables) are quite beneficial when there is a space problem to deal with. These items can be used during dining sessions. And after dinner gets over, they can be folded and kept beneath the couch or somewhere else. As a result, much space gets saved.

Folding Trestle tables are ideal for outdoor purposes as well. They can be easily carried for exhibitions, campaign, or excursion purpose. Custom designed trestle tables are hugely popular these days. However, wood is not the only material used these days to manufacture these furniture products. Rather, aluminum and iron are also used for this purpose. Metal framing with plywood surface are considered to be the cheapest substitute. They look nice and can last long enough with little care and maintenance. A wide collection of Tables pliantes sur treteaux is available through online stores at affordable rates.
