Windows 7 - Overview of a Stylish HTC XL by Joshua Davis

Article published on January 16th 2012 | Family

New HTC Sensation XL is built on the winning formula of the original popular. XL provides an alternative for those seeking a stylish smart phone, which is particularly suitable for music and multimedia use. In this article, I will provide an overview of its main features. Beauty Sensation XL HTC notably different appearance from the original version.

To start, the phone is finished in an attractive color program. This makes it a particularly head-turning device, which is ideal if you are one of the large number of users who view consciousness style of their phone as a fashion statement. Also, the phone is somewhat larger, to accommodate the larger screen.

Measures capacitance screen 4. 7 inch S-LCD, which means it actually lenders use multimedia games or view pictures and video. Probably beats sound publicized features of HTC XL is sound sense Beats by Dr Dre.

Music technology provides enhanced sound quality beyond offered by almost all other portable devices. As an added bonus, there is also a Beats headphones supplied with the phone. These are quickly replaced the iconic Apple headphones as a headset to be seen.

Combined with an abundance of 16 GB of internal storage and music widget Sense HTC, HTC Sensation XL is for a music phone finally. Of course, these savings need to carry a separate MP3 player. Internet Browsing HTC Sensation XL is equipped to connect to internet browser is provided by both 3G and Wi-Fi.

Then provide the fastest connection and added bonus of less power consumption and it does not use your data allowance. When the Wi-Fi network is not available, the handset calls when connected to 3G speeds of up to 14. 4 Mbps, which means web pages load quickly and stream YouTube video with very little lag when the buffer.

Camera HTC Sensation XL is an 8 megapixel camera that is on hand not only to produce high quality still images, but also high definition video footage (720p). The camera comes with all the extras that you would expect from a premium smartphone. This includes autofocus, LED flash, face detection and focus sensor.

The operating system of choice is Android Gingerbread (although it will also support Ice Cream Sandwich version), and it runs the user interface HTC Sense useful on top. This is a manufacturer of custom Android interface that is highly customizable with the ability to assign different applications and widgets to seven homescreens. HTC Sensation XL is available on other UK networks, some of which are provided with free handsets on selected tariffs.

Windows 7.
