Celtrixa scam rumors are making the rounds online for some time now. It is important that the real facts behind these rumors be revealed so that customers know the true picture. Women who have used the product for a long time now are perplexed that such scam rumors should circulate about a product that is indeed the best way to fight stretch marks.

â€¢ Celtrixa scam is definitely not a reflection on its performance as Celtrixa reviews would sometimes tell you. A simple logistics issue has been projected as one of deliberate cheating by those with vested interests. Real users of Celtrixa, however, are aware of the true value of the product and not deterred by these absurd rumors. Celtrixa is an advanced formulation that reduces the visible appearance of stretch marks. The presence of scientific ingredients helps in lessening the look of fine lines and patches that appear in 90 percent of women primarily after pregnancy.Treatment Options Galore, But None as Effective as Celtrixa

There are numerous treatment options available including invasive forms of treatment such as laser therapy, dermabrasion and plastic surgery. Plastic surgeons have tried other forms of treatment that combine harsh glycolic acid peels and other chemical ingredients but results are not all that encouraging. The safety of some chemicals used in many stretch mark creams have not been truly established during clinical tests which makes them unsafe for long term use.

Celtrixa scam rumors do not take into consideration the fact that this stretch mark cream, unlike other products, is specially formulated using a proprietary blend of powerful ingredients. These ingredients help reduce the appearance of stretch marks remarkably. The ingredients are designed to make the stretch marks seem less obvious by softening the skin and smoothing the skin tone. The product is extremely popular among women because it gives them an option to diminish the appearance of marks without suffering the embarrassment, pain and prohibitive costs of treatment such as laser or surgery.

You will be delighted with the improvement Celtrixa brings to your skin. The advanced ingredients, skin brighteners and moisturizing agents work in tandem to ensure that the gorgeous looks and suppleness of the skin is restored. The rich formula attacks at the core of the problem from its very first application. The active complex present in Celtrixa is specially formulated to prevent new stretch marks from showing up on the skin.

â€¢ Scam Rumors are Slowly Biting the Dust

If the purpose of the rumor mongers was to dent the popularity of the product by painting it as Celtrixa scam, the effort has clearly fallen flat on its face. The popularity of Celtrixa continues to grow unabated with thousands of men and women using it every day to treat stretch marks conveniently and affordably. The primary ingredient ReguÂ®-Stretch keeps the skin protected by keeping it hydrated and supple. It visibly reduces the length, width and color of stretch marks. Celtrixa also contains O.D.A. Whiteâ„¢, a brightening agent that visibly brightens the skin after just two weeks of application.

Celtrixa has emerged as the most reliable stretch mark lotion because of its ability to deliver visible results in minimizing appearance of stretch marks.
