Article published on January 30th 2012 | Finance

Taking loans and incurring debts has become a common practice these daysSpending money before it is earned is common in todayâ€™s world. One of the reasons contributing to this factor is the existence of economic conditions that are typically identified with factors such as recessionary and inflationary trends. Therefore, people seem to get perplexed and confused when it comes to selection between debt settlement vs bankruptcy.

The entire country is witnessing a record growth in the field of consumer debt. This figure has in fact reached an all-time HIGH. Because people are struggling with debts, it has prompted record number of consumers to opt between debt consolidation vs bankruptcy. Unemployment, illness, overspending or divorces are some of the reasons why people often choose the bankruptcy route. At the same time, there are some who think debt settlement is the ideal approach for improving their financial situation. For, it brings and immediate relief in their life because they are no longer required to face the harassment related with their creditors.

The mad rush for debt settlement can better be understood the advantages it carries. For instance, when you choose this option, you end up paying almost forty to fifty per cent of the amount you actually owe. Now, is this not good enough reason to favourfavors it instead of other alternative?

When it comes to debt consolidation bankruptcy, bankruptcy is considered to be the last resort one tends to choose. It is a common knowledge that it casts an negative impact of a long-term nature on the creditworthiness practiced by you. The bankruptcy continues to stay on the credit report for a long time sometimes even up to 10 years! Experts of the industry believe this can act as a hindrance to your ability for getting suitable insurance, credit or a job. This puts an additional responsibility on your shoulders to have a better understanding of all available options at your disposal before you arrive at a decision.
