Article published on April 21st 2012 | Fitness

As we grow older and enter our late thirties and early forties, we start finding changes in our body, some of which we might not like in particular. We might look expectantly in the mirror only to find a somewhat strange reflection staring back at us. The wrinkles, expression lines and blemishes make us look older than we feel and we find ourselves yearning for that natural glow and vitality of youth.

There is no reason to be depressed though. The changes that we experience in our skin, hair and posture are a natural part of the aging process, wherein our bodies undergo certain physical, chemical and biological adjustments. We cannot stop this process as a whole; what we can do, however, is, slow it down considerably by taking proper care of ourselves.

A good diet, regular exercise and a healthy lifestyle can go a long way in reducing the onslaught of wrinkles and age spots and keep us looking younger. One can also use some very unique and innovative anti aging products and Bb creams to turn back the biological clock to some extent and keep age at bay.

So, what are the tried and tested steps one can take to delay the specific signs of aging?

â€¢ Eating right

â€¢ Drinking lots of water to keep your system hydrated

â€¢ Adherence to a regular skin and hair care regimen

â€¢ Use of sun screen

â€¢ Use of anti aging products

As a matter of fact, there is a growing demand for anti aging products across the globe and leading manufacturers in the cosmetics and skin care business have been quick to identify this trend. These manufacturers are creating a whole array of high-end products for your face, neck, under eye area and hands.

These products for skin and hair care have helped many women to look and feel younger. This has been all the more true for women, for whom cosmetic surgery was never an option. There are specific products for cleansing, toning, moisturizing and exfoliating different types of skin. More and more people have used these products and managed to reduce the onset of wrinkles significantly. The over-the-counter anti aging products industry is a buoyant segment, catering to the needs of women in the 30 to 60 age group.

In most cases, manufacturers take certain steps to validate their claims regarding the effects of the anti aging cosmetics they sell. Clinical studies and consumer feedback analysis are carried out to understand the effects of these beauty products on aging. Only FDA approved products are used in the manufacturing process of the specific cosmetics that hydrate the skin and reduce wrinkles, while ensuring that there are no side effects on users. Leading dermatologists and plastic surgeons are on the pay roll of these companies; these experts carry out extensive research and development before coming up with some really innovative products that help combat aging.
