Allergens Affect More than 50 Million People by DJ Keller

Article published on January 4th 2012 | Fitness

Many millions of people suffer from chronic allergies due to problematic indoor allergens. Using an effective high quality air purifier at home and at work on a daily basis will go a long way to remove troublesome allergens and improve indoor air quality. The cleaner air will reduce your allergies and enhance your wellness.

Allergens can make you Sick

More than 50% of homes harbor allergens affecting 50 million Americans according to the National Institute of Health. An allergy is an abnormal immune system response to an allergen that comes in contact with your skin, nasal passages, or through inhalation, ingestion or injection. Allergy symptoms include itchy skin, hives, runny or stuffy nose, itchy watery eyes, rashes, coughing, wheezing or trouble breathing. The most common indoor allergens include pet dander, dust mites, mold spores, and household chemicals. Itâ€™s good to be aware of odors in the home, as many times they can be a warning sign of a potential problem. Outdoor allergens include pollen, grass, weeds and mold.

How to Eliminate Allergens

To learn how to eliminate allergens in your home and to improve indoor air quality, visit www.sanibulb.com for a simple bright idea. Theyâ€™ve made purifying your air as easy as changing your lights with the SaniBulbâ„¢ Air Purifier CFL Light.
