Eco Room Deodorizer is the Healthy Choice by DJ Keller

Article published on January 4th 2012 | Fitness

A good room deodorizer will destroy harmful chemical odors without covering them up them with hazardous fragrances and result in a healthy home. By really eliminating odor instead of using air fresheners that merely emit harmful fragrances, you will enhance your indoor air quality and prevent exposure to dangerous chemicals.

Air Fresheners Contain Harmful Chemicals

Air fresheners can emit hazardous chemicals according to the Environmental Impact Review. Scented sprays, and air fresheners donâ€™t offer any health benefits. For a person with or without asthma, air fresheners can cause breathing difficulties, and can contain several harmful chemicals, including cancer causing benzene and formaldehyde. Reputable environmental groups now confirm that in houses, offices and restrooms, Americans suffer significant exposure to a cocktail of dangerous and potentially harmful chemicals. In cases of mold, mildew and damp indoor environments, air fresheners may hide an odor indicator of potentially serious health threats.

Eco Room Deodorizer Destroys Odor without Hazardous Fragrances

To really solve odor problems, you need an eco-friendly product that destroys odor without masking them with harmful perfumes. This results in a healthy home that is safe for the family. To learn more about improving indoor air quality with an eco-smart deodorizer, visit www.sanibulb.com for a simple bright idea. Theyâ€™ve made deodorizing the air as easy as changing your light bulb.
