Article published on March 16th 2012 | Fitness

Looking the best with a blemish free and perfectly radiant skin is the natural desire of many women. With the advent of IPL (Intense Pulse Light) - a light-based aesthetic treatment technology - achieving soft, supple and hair-free skin has become more easy and effective. If you are a resident of Perth, Western Australia, looking for the availability of IPL hair removal and other beauty solutions, you have reached the right place. This article explores the availability of IPL skin treatments in Perth and intends to enhance your knowledge about the treatment. There are numerous beauty and skin treatment clinics that provide this cosmetic service to patients in Perth and throughout Western Australia.

IPL treatments in Perth

There is a common misconception that IPL can only be used for permanent hair reduction or removal. IPL eliminates excess or unwanted hair safely, quickly and effectively on most parts of the body. Besides hair elimination, it also successfully treats a range of skin conditions that can give us cause for concern.

Most IPL treatment providers in Perth effectively use this technology to treat other skin disorders and imperfections such as pigmented lesions, freckles, sunspots etc due to over exposure to sun; hideous red veins; vascular lesions on face; scattered red scarring; poikiloderma; uneven skin tone; ugly skin blemishes; and so on. If you want to have a fresher looking, more uniformly textured and toned complexion, IPL can be the right answer.

Intense Pulse Light skin treatment offers a better hair reduction option when compared to the popular laser and electrolysis technologies and other traditional methods such as shaving, waxing and threading. IPL device used for the removal unwanted hair and skin spots utilizes a flash lamp to release various wavelengths of lights.Â The light infiltrates through the epidermis and destroys the hair follicles and cells that cause excessive hair growth and dark spots. The cells are wiped out by heated energy. A course of treatments is recommended to achieve a completely hair free skin.

Make informed decision while choosing your IPL provider

There are numerous cosmetic clinics in Perth that offer IPL treatment for hair reduction and blemish free skin. Since IPL is currently unregulated in Australia you need to be cautious while choosing the clinic. If you trust yourself to a person who lacks enough knowledge of the skin or basic light physics, you will be causing more harm to your skin. If the devise is handled by wrong hands it can cause burns, permanent blemishes and lasting complications besides causing absolute wastage of money.

Accurate wavelengths of light, exposure duration and energy levels have to be decided by the therapist and the heat should be discharged into melanin to selectively damage the target cells. The adjacent skin should remain unaffected without leaving any scars and marks. In the right hands, IPL will give very effective solutions to your skin concerns. Ensure that you are consulting an experienced and highly qualified dermal therapist. Look for therapists who have attended recognized IPL training courses and have received extensive clinic guidance in hair removal and skin revitalization.

IPL has become the treatment of choice for many in Perth thanks to its long lasting effectiveness. This breakthrough technology can change the way you look if proper inquiry is made about the clinic

and therapist you are consulting.
