Article published on January 4th 2012 | Fitness

According to a New England Journal of Medicine article published by Harvard medical researchers, the cleaner the air you breathe, the longer you will live. Utilizing a room air cleaner filter to reduce pollution will keep you healthier and could expand your lifespan. By destroying pollutants, a room air cleaner filter will improve indoor air quality and prevent the harmful effects of chemical and biological exposure.

Indoor Air Pollution Results in Poor Health

"Indoor pollution can be as much as 100 times greater than outdoors" according to the Environmental Protection Agency. Health effects from indoor air pollutants may be experienced soon after exposure or, possibly, years later with varying effects.

Immediate effects from pollutants may show up after a single exposure or repeated exposures. They include irritation of the eyes, nose, and throat, headaches, dizziness, and fatigue. Such immediate effects are usually short-term and treatable. Often times the treatment is simply reducing the person's exposure to the source of the pollution. Some people can become sensitized to biological pollutants after repeated exposures, and others people can become sensitized to chemical pollutants as well. This syndrome is referred to as Multiple Chemical Sensitivity (MCS).

Room Air Cleaner Eliminates Pollutants

Use the Sanibulb Home Air Cleaner Filter to eliminate microbial and chemical pollutants. To learn about improving indoor air quality, visit sanibulb.com. Theyâ€™ve made cleaning the air as easy as changing your light bulbs. Simply switch to the SaniBulbâ„¢ Room Air Cleaner filter to provide quality lighting and improve indoor air quality. SaniBulbâ„¢ Room Air Cleaner filter uses nanotechnology and light to fight pollutants. SaniBulbâ„¢ also deodorizes while reducing energy costs. SaniBulbâ„¢ is the new EcoSmart, EnergySmart and HealthSmart Room Air Cleaner Filter Solution.

Use a Room Air Cleaner in Every Room

SaniBulbâ„¢ Room Air Cleaner filter can be used in every room by simply changing light bulbs in:

Living Area, Dining Room, Bedrooms, Bathroom, Kitchen, Basement, Closet, Study, Hallway, Pet Areaâ€¦.
