Article published on May 8th 2012 | Food

When the oppressively hot days of late summer bear down upon us, there comes a day when we actually begin to long for the brisk days of winter. After months of unbearable humidity and excessive heating bills, it is no wonder that many people long for the short days of winter.

Of course, it isnâ€™t long into January when many of us who wished away the summer begin to count down the days until spring again. As brutal as a heat wave in August can be, it really is nothing compared to the inconvenience of winter blizzard after winter blizzard.

Between the crushing cold of the winter and the intolerable heat of the summer, however, lies the sweet spot of spring. Every year we never quite know just how long spring will last. Sometimes it will pop up in early March and then suddenly disappear again a few weeks later with a late season snowstorm. Other times the winter will drag on for months and then after just a few short weeks of moderate temperatures, summer comes blasting in early.

The key to enjoying moderate temperatures is to take advantage of spring as soon as it comes around! Donâ€™t waste those wonderful 70 degree days sitting indoors watching television. Get out and make the most of that incredible weather!

The very best spring days can actually remind us of the childhood we left behind long ago. And with a delicious spring treat you can hearken back to the happy go lucky times of your childhood. These old-time treats will bring your heart and mind around to the days when you truly felt footloose and fancy free.
