Article published on December 6th 2011 | Food

Boresha Bsweet, which is proudly launched by Boresha and Skinny Science, is the first and only 100% natural, low Glycemic, non-Cephalic, fruit sweetener. It is also known as "Acaisweet" because it is made from acai berries and is facilitated by clinical trials and numerous patents. It does not have any soy products, egg or milk products, any nuts like peanuts or coconuts, wheat based ingredients or any seafood. Boresha Bsweet is extremely pure and it is good enough for kids and has undergone medical tests in children ages from 6 to 18 and adults. It is the healthy substitute of sugar that tastes, looks and feels just like real sugar and pure crystalline in nature. Since it is qualified as kid-friendly, you can use it not only in your coffee and tea, but also enjoy while you are baking, preparing your food or in your cereal, lemonade etc. In fact the buyers can make a use of it whenever you want to. It has many more beneficial properties such as it can be used in place of high glycemic carbohydrates, free of artificial sweeteners, can be taken as a alternative to sucrose, high fructose corn syrup, high glycemic sugars and glucose polymers. It does not include high glycemic fruits or other high glycemic ingredients like Sucrose, Maple Syrup, White Grape Juice, High Fructose Corn Syrup, Honey, Rice Syrup, and Licorice, Molasses, Sugar Alcohols. It is an ideal counter-part to Boresha Coffee.

Boresha Science has proven that all products of it like Skinny Coffee is the absolute answer to the problems of obesity, diabetes etc and is a gateway to the healthier world. Boresha Coffee is essential because normally coffee stores fat in human body. Skinny Coffee is the first and only beverage designed by Glycemic Index Researchers. It is healthy, natural and burns fat in a regular manner without any hard exercises. It can be proved that by the intake of Skinny Coffee you can burn the fat 800% faster than jogging for about 2 miles. It is thermogenic, contain buffered-caffeine and has all the properties to combat stress. We deliver Skinny coffee in 1 ounce packets that brew one pot of coffee and produces 2 - 12 ounce cups per pot and you can add more water for a lighter coffee taste if you require.

Buffered caffeine is the one and only buffered caffeine that decreases the fat storing and any imbalances of blood glucose, which is caused by digesting caffeine and caffeine rich food and drink. It is a patented edible computer chip that makes the body ready to burn fat instead of storing fat into adipose tissue fat cells and to release maximum energy. Boreshaâ€™s infrared roasting skill also known as â€œState-of-the-Artâ€• is a exclusive method by which the beans are roasted lightly and consistently in small quantities to bring out the most wanted taste and aroma, and promise equally controlled flavor. This coffee is prepared only from pure, 100% organic, fair traded AA Arabica beans, which are picked at their main time by from the original African soil that assures the customers of receiving the best crop for crushing.
