Hot Tub signs â€“ Precaution is Better Than Cure!

by Kevin Williams

Article published on February 20th 2012 | Gardening

Everybody loves a relaxed hot tub bath. And one of the best ways to relax and rejuvenate after a long and tiring day at work is by spending some time in a hot tub. You can just sit back in a tub filled with bubbles, bath sand and hot water and forget about everything else in the world. However, when you are using a common hot tub, used by a large number of people at a public or private facility, it is not always safe. This is because everyone who uses the hot tub might not be very hygienic. Hygiene is very important, when you are using something which is shared by a lot of people. This is the reason why tub signs are so important. Hot tub signs are display boards made of rust-free aluminum and heavy duty vinyl. They show the necessary rules that should be followed by anyone who uses the hot tub. These signs feature bold texts in a number of colors to make them look attractive.

It is important to have spa signs because:

1. They help you to be safe and clean in the spa or the hot tub.

2. They make a difference in the spa area.

3. They summarize the necessary details like the maximum number of people who can enter the hot tub and display other such important information.

These hot tub signs are similar to the pool signs in a number of ways. They are displayed for the safety and security of the people. Some of the safety rules these signs display are:

* It is compulsory to shower with soap before entering the hot tub or spa.

* Enter and Exit the hot tub slowly. Do not jump in and out.

* No diving.

* Bringing of glass in or near the hot tub is not allowed.

* Eatables and Drinkables are not allowed in the hot tub.

* Elderly people and pregnant women should consult the doctor before entering the hot tub.

* Children must be supervised by an adult.

* If the temperature reads more than 104 degrees F, then do not enter the tub.

* Do not use soaps or oil in the hot tub.

Thus, there are certain rules that should be followed by everyone in the hot tub or the spa for the well being of themselves as well as others. The best way to convey these rules is by using such hot tub signs!
