Article published on July 4th 2012 | Hardware

A party means birthday and other occasion. Generally, a birthday celebration, anniversary or any other occasion is usually accompanied with a party either for children or adults, or even both if it is a family organized party.

To make such special celebration memorable and overwhelming, people are now turning to technology for making cakes or cupcakes an extraordinary centerpiece that would attract everyoneâ€™s keen attention. Today, the computer and the ink cartridge are paying crucial role in our day-to-day life. The use of these gadgets has made it easy to print documents for work, get hard copies of any project and for businesses printing needs. But have you ever thought a printer to be a part of a birthday party celebration?

Printing edible images for cakes, cupcakes and pastries is the popular printing idea practiced by master chefs and many enthusiast home bakers. A beautifully decorated cake with edible images printed on the top will add to the splendid of any social event like weddings, birthday parties, anniversaries, business success, and a reunion party.

The art of making cakes with edible photos have also become a passion for home bakers since they want the cake they will be preparing for that special occasion is personalized for their loved one.

To begin printing on food stuffs, you do not have to buy a new printer. It is possible to convert an old inkjet printer that has been used earlier for regular printing to a dedicated printer for edible printing. All you need to do is to make some changes by cleaning the printer meticulously, especially the printer head, to remove the ink traces of the regular ink that was previously used with it.

Generally, there are two brands of printers available on the markets that have compatible edible ink cartridges available for special edible cake printouts. These are Epson and Canon. A line of Epson printers that are used for edible printing are- Epson WorkForce 500, WorkForce 600, NX100, NX200, NX300, NX400, CX5000, CX6000, CX7000F, CX7400, CX8400, CX9400F, and Stylus 1400. The Stylus models include- 1400, C87 and C87+, C88 and C88+

The Canon printers that are generally utilized for birthday cake printouts are- MP510, MP520, MX700, MP500, MP800, MP810, MP830, M850. Also printers utilized in the printing are- IP3300, IP3500, IP6600D and IP6700D. Plus, a wide range of Canon Pixma line can also be used for the task.

The information in this article does not represent any particular companyâ€™s opinions or suggestions. Edible ink printing should follow the instructions of the manufacturer from whom you buy your edible ink supplies, and it should be noted that the mixing of edible ink and regular inks should not be done.
