Android Tablet PCs- a Useful Product by John Smith

Article published on May 10th 2012 | Hardware

Today's world, computer is very much common thing and important in everyone's life. Each and every person knows about the computers even the child too. Anyone who does not know much about it should try to learn so they can get advantage of various applications available for them. But nowadays, android tablet pc changes everything in life. Using Android tablet you can do everything that you want to do on your computer. The android tablet pc has some pre installed feature of applications such as Gmail, Google Maps, Skype and also third-party applications like Facebook, twitter and many more. It has some game applications also for fun. Today's Android market is flooded with 7 inch Android 2.2 Tablets and 10 inch Android Tablet Pcs.

The Google Android Tablet is very useful and very handy for use so that you can work on your projects, check and send E-mails while traveling in car, bus or any where else. It's just like carrying a mobile and also no need to carry big heavy laptop with you. Everything now became so easier with the use of android tablets pc. By using it, you can browse the internet, watch movies, read e-books, chat with your friends, and play your favorite games, do whatever you love to do from anywhere in the world.

Android 7 Inch Tablet PC is smaller than a desktop computer and even more compact than a laptops or notebooks. Tablet PCs are available in size range from 5 to10 inch in market. What makes the Tablet PCs better than a notebook or laptop is that their capacitive touch screen. Because of Android Tablet has complete touch screen, you don't need a keyboard while typing or editing on the screen and you can just use your finger for that. Android tablets can have different screen resolutions which come with 800 * 480 pixels and some have 1024 * 600 pixels. The basic android pc has a 256 RAM and supports expandable memory with SD up to 32 GB. Android Tablet comes with WiFi so that you can connect with browse internet from anywhere without using any wire or USB dongle. The battery backup are 6 hrs without WiFi and 5 Hrs using WiFi. The Android Tablet runs on Android operating system depending on your Tablet capacity and you can use the higher version of Android OS like Android 2.2 Tablet, Android 2.3 Tablet etc.

The Android Tab supports all format of audio and video such MP3, WMA, FLAC, AAC, AC3, OGG, AVI, MPEG4, MPEG2, WMV, RMVB, and FLV. It also supports all image formats like JPEG, PNG, BMP and POISON. You can use your tablet pc to download some useful applications online such as Ms Office, PDF and more than 80, 000 applications you can download from android market. It is proved that Android Tablet PCs are the outstanding tablet with its performance and look.
