Edible Ink and Inkjet Printer to Wonderfully Create Cake Printouts by Richard Donna

Article published on August 4th 2012 | Hardware

You might have seen how bakers and cake makers put photographs, images and any printed detail on cakes, cookies and pastries. These are the creativity done with the application of edible ink and an inkjet printer. If you have an inkjet printer at home, you can take the initiative to print out edible images for your cakes and cookies and make a mark with your creativity. You can try this out at home even if you have never acquired a professional decorating course.

Edible ink is a FDA compliant food coloring that is specially formulated and made from food-grade ingredients, which are considered safe to be used on food items. Most of the manufacturers ensure that their products can be aligned with traditional paper-printing inks and can render the same degree of effervescence and color matching. These products are sold in cartridges and are available online and in local food and craft stores. If you are using an old inkjet printer for this work, then seek advice from your manufacturer or follow their guidelines to replace the prevailing regular ink cartridge with the edible ink cartridge and start printing within minutes.

During the printing process, the ink is allowed to spray onto edible sheet or frosting paper which is also made from food compliant ingredients such as, rice and corn starches and sugars. Edible paper is basically a thin layer that is water soluble and when dissolves in the cake frosting, it leaves beautiful printed designs behind. Also there are available specialty backings that dissolve only under certain conditions. Before you use edible ink, make sure to check the manufacturer's instructions to verify that your printer is compatible with the edible cartridge.

It is not difficult to work with edible ink and inkjet printer. You can take a print out at home and use it to decorate your home bakery items. If you do not want the hassle of printing at home, take services from the cake printer shops. These shops are readily available online and they offer excellent customer-care service and best quality products. You can also buy edible supplies including the printers from them and get started with to flaunt your creativity. These online stores also assist you with information about how to operate the printer and use edible ink effectively. You will also get refills of the edible cartridges whenever your cartridge runs out.

Get your own edible products and start creating something new from your own house!
