For IT consulting and computer help Atlanta residents and businesses may find that obtaining the best computer services can be expensive and confusing at the same time.

When people seek IT consulting Atlanta services, it is usually for one of three reasons.

- 1) They feel a firm can give them additional knowledge about the best technology or provide assistance in finding new equipment as well as obtaining needed computer support.
- 2) Sometimes this informational need also involves improving the performance of existing computer systems and networks, and
- 3) Other times, computer users find that they simply do not know what is wrong but need help with a slow or lagging computer.

Once it has been determined that it is time to get computer help Atlanta citizens will need to know what services are actually provided by IT consulting Atlanta firms. Here are four typical services offered by IT consulting and computer help Atlanta companies:

Network and PC Troubleshooting

When computers cannot connect or view other computers on a network, then help is needed to find and fix the network problem. Because there are so many different configurations of networks and operating systems, computer help Atlanta companies are the best solution to finding and repairing network issues. The same applies to troubleshooting and diagnosing PC errors and issues. Professional computer repair will quickly isolate the issue and get a system back up and running in no time.

Installation of hardware

Computer help Atlanta services will also install new hardware and troubleshoot existing hardware conflicts. When new hardware is installed, it can sometimes create conflicts with other software or hardware so help is needed to get everything operational and running smoothly. IT consulting Atlanta services will also often include hardware upgrades that will help increase computer speed. Whether a computer needs increased memory, faster hard drive or video cards, professional services can advise and guide users through the process of finding the best solution to the problem.

Removal of Viruses, Spyware and Malware

When a computer restarts without prompting, freezes, won't start or slows down, it is highly likely that the system has been infected with a virus, spy or malware. Computer help Atlanta residents need is simply as easy as calling an IT consulting Atlanta company to safely remove the infection, preserve valuable data if possible and then get the computer running again.

Computer Security

Preventing malicious viruses, spyware and malware as well as hackers is vitally important to keeping a computer running but also preventing sensitive and private information from being taken from computer data files. Properly installing internet security software and protocols is the first line

of defense IT consulting Atlanta companies can help provide against these attacks.
