Google Android Tablets for 2012 by John Smith

Article published on February 29th 2012 | Hardware

Android Inc. was founded in 2003 and later acquired by Google Inc. in 2005. With the development of the Android software, the 7 inch android tablet is the first of the few tablets with Android version 2.1. An android tablet is a palmtop-like gadget, with various features, which include phone calling, browsing, photo viewer, e-book reader and multimedia player. Android tablets are available in the market with 7 inch, 8 inch and 10 inch. Smart phone manufacturing companies like Nokia, HTC, Samsung, LG, and Sony are now using different versions of android O.S for their latest smart phones.

With one click one can make phone calls, access web pages and email, view photos, watch films, play games, and take pictures and videos - all on android tablets.

For all the tablet lovers, 2012 is packed with many surprises. The first among the launchers of android tablet in 2012 is going to be technology giant Intel. Intel representatives have revealed some tidbits about the release of Medfield Atom Tablet by their collaboration with Google and Honeycomb. The Medfield prototype android Honeycomb for now is being showcased along with a slideshow. Its performance appears to be outstanding and the design is very sleek and amazing having a lot of resemblance with BlackBerry Playbook tablet, said Lisa Zhou, PR manager of.

Another attraction to look for is Game Stop's Android based Tablet which is likely to hit the stores in 2012 as well. It is widely rumored that the android tablet of GameStop will be a successful release and will include all the powerful features such as spontaneous interface, a protected purchase organization, excellent streaming and perfect tablet functions. The tablet will be pre-loaded with games and will utilize Game Stop's streaming ability to move console games to the Tablet. In addition, a gossip in the air is that Motorola is planning to release a brand new tablet for 2012 with extra high quality resolution screen after the success of Motorola Xoom. To beat Apple iPad2 Motorola has put much effort in this tablet. It is going to have a 10 inch screen with a high resolution of 2048 x 1536 making it one of the best quality screen and display devices ever to have been launched.

The popularity and future success of android powered tablets can be seen by the fact that android shipments are likely to increase by 130% by the next year as compared to Apple's iPad shipments which are estimated to increase by 55% according to android news and forums.

According to analysts, Apple's iPad will still capture the market of android tablets in the year 2012. But Samsung, LG and Motorola's tablets are going to give a tough competition to iPad. It is also rumored that Microsoft will soon manufacture its own android powered tablets as next generation of Microsoft windows. Just like Android phones have outshined Apple's iPhones and are sold more than them, in the same way android driven tablets are going to outsell Apple's iPad by the year 2012. Even if it isn't true, Apple must be vigilant to have a tough competition for tablets in future.

Another highlight is that USSA (US Cellular Announcements) have announced a release of seven Android phone tablets in the year 2012. It will include a 7-inch android tablet called Flyer by HTC. It will also include Motorola's 4.3 inch phone with 1 GHz processor speed. LG will announce one of the most sleekest and lightest in design android tablet phone which will have 4inch touch screen display. Samsung and Huawei will also announce initial android tablet series in 2012. So a lot is coming your way in case you are a tech geek wanting to buy the most innovative and feature-rich tablet of 2012.
