Article published on April 18th 2012 | Hardware

When it comes to the world of hard disk drives, there are very few companies that have established a niche and lead in this industry, like Seagate. It has not only been the traditional leader in the manufacture of hard drives, but even today it remains at the top whether in terms of quality or size. Here you will find one of the most stunning portable hard drive that Seagate has offered to the industry. Seagate FreeAgent GoFlex Desk is capable of storing 4TB of data. This drive is already considered to be the most versatile of all the desktop hard drives for the office.

The Seagate FreeAgent GoFlex Desk has a faster USB 3.0 connectivity with an alterable interface. It also offers the versatility to easily switch between the PC and the Mac without any need of reformatting. It has a black plastic chassis with an appealing gleam and a black colored matte stripe that runs through the centre. There are vents over the back and the top that ensure that this massive portable hard drive remains cool. The drive has a base which is actually a GoFlex adapter. Using this system you can switch the USB 3.0 connectivity with eSATA, FireWire, Thunderbolt or anything else for faster connection that may come in the future. There is an LED gauge in the adapter base for indicating the occupied space in the hard drives entire capacity.

When taking into account the weight of the portable hard drive and that of the GoFlex adapter, the overall weight of this 4TB monster is just around 1.10 Kg. It measures 6.20 x 4.90 x 1.70 inches which is smaller compared to most of the other desktop drives available. If you are seeking some sub 1TB hard drives from Seagate, there is another alternative in the form of Seagate GoFlex Turbo. This is a 750GB monster portable drive that is compact and goes with your laptop Similar to the Seagate GoFlex Slim, it has a speed of 7,200 rpm and it is available in two configurations â€“ a 500GB and a 750GB capacity. In addition, it can easily fit with the other GoFlex adapters from Seagate.

Thus, whether you have a desktop or a laptop, you can always rely upon Seagate to keep your data safe inside their massive external hard drives.
