Article published on May 29th 2012 | Hardware

The RHCA is the most senior system administration credential and is designed for technical leaders working in demanding enterprise environments. A Red Hat Certified Architect will have proven the skills required to design and manage a complete infrastructure for large complex environments. RHCA competencies span servers running operations, back-end databases and storage in the datacenter, corporate desktops, and beyond.

A Red Hat Certified Engineer who earns RHCA training brings an exceptional breadth and depth of knowledge to the biggest IT challenges. RHCA certification incorporates the skills and knowledge of a Red Hat Certified Datacenter Specialist plus advanced networking services security, system monitoring, and performance tuning.

The course or modules for RHCA includes:

â€¢ RHS333 â€“RedHat Enterprise Security : Network Services

RHS333 goes beyond the essential security coverage offered in the RHCE curriculum and delves deeper into the security features, capabilities, and risks associated with the most commonly deployed services.

â€¢ RH 401 - Red Hat Enterprise Deployment and Systems Management

Red Hat Enterprise Deployment and Systems Management (RH401) is a course that explores the concepts and methods necessary for successful large-scale deployment and management of Red Hat Enterprise Linux systems. Experienced system administrators will learn how to implement and manage Red Hat Enterprise Linux deployments efficiently and effectively, in ways that make their systems manageable by a team of administrators

â€¢ RH 423 - Red Hat Enterprise Directory Services and Authentication

Red Hat Enterprise Directory Services and Authentication is an intensive course designed to train senior system administrators in the skills required to manage and deploy the Red Hat Directory Server on and for Red Hat Enterprise Linux systems. This course also covers cross-platform integration of directory services in order to provide authentication or information services across the enterprise

â€¢ RH 318 - Enterprise Virtualization

Red Hat Enterprise Virtualization (RH318) explores the virtualization features of Red Hat Enterprise Linux managed through the Red Hat Enterprise Virtualization suite

â€¢ RH 436 - RedHat Enterprise Storage Management

Red Hat Enterprise Clustering and Storage Management (RH436) provide intensive, hands-on experience with storage management, Red Hat Cluster Suite, and the shared storage technology delivered by Red Hat Global File System.

â€¢ RH 442 - Red Hat Enterprise System Monitoring and Performance Tuning

Red Hat Enterprise Performance Tuning is designed to teach senior LinuxÂ® system administrators the methodology of performance tuning for Red Hat Enterprise Linux.

Unlike the RHCSA and RHCE certification programs, RHCA courses can be pursued on module basis i.e. each course can be taken separately and Redhat endorsement can be achieved for that particular course by taking the certification exam successfully for the same, making it convenient for senior administrators to choose their area of specialization without going through the entire course saving money and time

RHCA training is aimed at senior Red Hat Enterprise Linux system administrators and other IT professionals working in enterprise environments and mission-critical systems. The training is providing in all over India like in Hyderabad, Mumbai, Bangalore, Chennai, Kolkata, Pine, Ahmadabad, Delhi, Noida and Amritsar. And also it is provided in worldwide like in South East Asia, Europe, Middle East, UK-Ireland, USA, Australia, New Zealand, Canada.

RHCA Hyderabad institutes pride themselves on delivering the most updated technology to their students. Their courses are designed to cater to the ever growing demands of the industry. They hold over several years of experience in the industry and possess eminent professionals who can provide you with the best service.

Red Hat Certified Architect (RHCA) is a capstone certification to Red Hat Certified Engineer and Red Hat Certified Technician, the most recognized, acclaimed, and matures certifications in the Linux space.
