Tips to buy toner cartridge for your printer by [Avena Sowell](#)

Article published on December 14th 2011 | [Hardware](#)

Buying online is a good option when it comes to printer toner cartridges provided a few simple steps are followed to ensure the quality

Your printer is one of the most important equipment that you have along with your computer for your business. For personal use, a printer needs good care to function properly as you do not take printouts quite often. For your business, the printer demands even more care as it runs constantly. However, the most important part of a laser printer is the toner that is used in the printer cartridge.

Toner is carbon powder melted and mixed with a polymer-based compound and used to create the print impressions through laser printer. The powder particles are electrically charged to produce the images and the text on the paper. In case of colour laser printer toner, the toners are available in four CMYK (Cyan, Magenta, Yellow and Black) colours. For your printer, whatever be the make and model, the toner cartridge is a replaceable part and you should know how to buy the best that suits for your computer.

Every company that manufactures computer printers also produces the ink toner and the toner cartridge to be used in a particular printer from that company. You can buy the specific cartridge from a computer supply shop or online. The online option is the better as it is convenient, cheaper and reliable. If you want to buy brother toner cartridges or any other toners, you can safely buy it from any online stores that sells printer parts and other accessories. However, like all other businesses and online stores in that case, laser toner online shops are not equal in service and it is not advisable to buy from any one that you find online.

A good shop that sells brother toner or any other toner cartridge can be judged based on the following criteria:

Availability of products from multiple brands – A good online store should have an inventory comprising of wide range of products from all the top brands. Ink toner or cartridge from almost every top brand should be available on the online store.

Telephone support – The online store should have a telephone support number boldly displayed on the site in case a customer wants to confirm something before he/she buys.

Return policies and shipping information – The online store selling printer toner should have a separate page describing the privacy policies. Also, the shipping information should be displayed correctly on the site. Also, make sure that you can find the return and refund policies on the site and the terms are mentioned clearly.

Payment processing – the online store from which you want to buy your brother toner or any other toner, should accept major credit cards. Also the payment option should be secured (should change to –https™ from –http™) with proper encryption to safeguard your credit card information.

Good testimonials – Make sure that you check the testimonials given by previous customers. Good testimonials prove that the store helps the customer sincerely.

While buying printer toner cartridges, make sure that you check for good deals. A good online store should always have a promo programme going on and you can always make use of it if you look carefully.
