What makes Acer TravelMate the leading netbook choice for those on the go? by AngeloEverton

Article published on April 18th 2012 | Hardware

Do you want to take your business along everywhere you go? Acer is among the top 5 netbook makers in the world and the leader in Europe. One of the most popular series from the Acer stable is the TravelMate that is loaded with high-end features that consist of reliable processing speed and durability, varied communication abilities and high-end security features to keep the moving professionals always connected. The series of acer laptops keeps your business running without concern whether you are on a business trip or on a vacation. You would be enjoying manageability at the corporate level and simple handling. And, the unique energy-saving and eco-friendly features and design ensure that you save both costs and the environment.

The Acer TravelMate series is powered by a powerful, energy efficient and fast processor. And, the acer laptops integrated graphics are designed to help business professionals to give their impressive presentations without any flaws or lacking. The compliance to ENERGY STAR ensures that the notebook reduces the amount of power consumed. TravelMate 5760 is among the leading models in the TravelMate series that is powered by Intel Core i3-2310 M dual-core processor. Its 15.6â€• screen has a peak resolution capability of 1366 x 768. The RAM configuration is 4GB DD3 SDRAM with a speed of 1066 MHz. The dual slots allow you to expand it to 8GB.

The Acer netbook has a SATA hard drive with storage capacity of 320 GB and speed of 5400 rpm. Other features include card reader, webcam, Wi-fi, fingerprint reader for high-end security, and 6 Lithium-ion batteries. The card reader can support MS, MS Pro, SD, MMC and xD. The display can support 16.7 M colors on an Active Matrix TFT Color LCD with LED backlight feature. Gamers and video players will find the Intel HD Graphics 3000 card to be something more than they can handle. The dual-core processor has a peak speed of 2.1 GHz and a cache of 3 MB L3.

All the processing power of this Acer netbook are supported by the Mobile Intel HM65 Express chipset. Your communication requirements can be fulfilled with Gigabit Ethernet and Wi-fi IEEE 802.11b/g/n but there is no Bluetooth. The different interfaces offered on the TravelMate series of acer laptops include 3 USB 2.0, HDMI, VGA, microphone, RJ-45 and one headphone. And, last but not the least, the battery can continue working for 4 hours.
