24 Hour Veterinary Care with heart and soul. by [Narindersingh](#)

Article published on March 20th 2012 | [Health](#)

If your cat has an upcoming surgery, there could also be a way of uneasiness among you. That's perfectly natural. Whether or not the surgery is an elective spay or neuter, non-elective and required to get rid of or biopsy foreign tissues, or emergency as a result of a heavy accident, there are several things that you just will do to assist guarantee a secure recovery. Pre-Op there'll be variations, obviously, between what you'll be able to and cannot do before an emergency surgery versus a scheduled procedure.

So, those things mentioned Veterinarian San Marino here are most meaningful if your cat is undergoing elective or non-elective surgery. A cat mustn't eat for a minimum of twelve hours before surgery. Meaning that you just ought to take the food dish away the night before the procedure. Most vets can recommend that no food or snacks be given once six o'clock within the evening. This helps scale back the probabilities of aspiration - the inhaling of - throughout or shortly once surgery. As a result of anesthesia will cause several cats to vomit, if the abdomen isn't emptied, the food particulars that are spoken throughout vomiting will be drawn into the lungs and cause terribly serious infection. So, whereas food should be withdrawn, a water dish could also be disregarded for your furry friend.

You must additionally keep the cat within before surgery. This prevents the feline from snacking outdoors or disappearing simply before you're set to depart for his or her appointment. These days, pets aren't thought of simply as animals, rather they're thought of as youngsters.
