Advantages of Diode Laser Hair Removal Done and IPL Laser Hair Removal by [Vervena](#)

Article published on February 28th 2012 | [Health](#)

Laser hair removal techniques have been refined through years of research and experiments to make it the most effective way of hair removal. As such, it will not be wrong to say that out of variety of lasers, we can use just few of them for getting the desirable results. Therefore, most of us might have heard about the Diode laser hair removal and IPL Laser hair removal techniques two most popular ways of removing the unwanted hair in a painless way. In fact, mankind have been cautious to remove the unwanted facial and body hairs from the time immemorial. More often people used to prefer to shave, wax or use hair removal cream as they were not aware of the facilities available at laser hair removal London beauty treatment clinics.

Let's try to understand the different types of laser techniques used for hair removal. On a broader scale, most commonly used lasers are- Diode, Alexandrite, ruby, IPL and ND: YAG. Since, the local people will be able to avail the facilities of Diode and IPL laser hair removal at their favourite laser hair removal London based beauty clinic, it will be extremely beneficial for them to understand the advantages of both the types of advanced hair removal techniques, separately.

Advantages of Diode laser hair removal:

- Diode laser is truly beneficial for the treatment of ingrown eyelashes.

- Diode laser is featured by longer wavelength, which is the best reason of gaining better results for the removal of unwanted hairs on the dark-skinned people.

- It can be applied on the large body areas and it assures speedy recovery as well.

- It is a non-irritating and non-invasion method, with almost no chance of bacterial infection.

Advantages of IPL laser hair removal:

- It is extremely cost-effective way of hair removal if you compare the prices of the IPL laser hair removal sessions with the life long expenses of the other methods of hair removal.

- It is a painless method of hair removal, and provides long lasting results, and ever lasting results in many cases.

- In the cases of hair regrowth, the hairs will be lighter in colour, as compared to their original texture. However, you can ask the laser hair removal London professionals to provide complete sessions of IPL laser hair removal to eradicate the chances of hair regrowth.

- IPL is safer on skin.

Although, we cannot measure the advantages of using both the types of lasers for hair removal, nothing can be better than the achievement of much better looks that enhances the confidence level of an individual. If, you have made up your mind to approach the laser hair removal London beauty clinics, then you should not fail to put your questions regarding the cost factor and the number of sessions required for your skin type, to their experts. This will help to clear your doubts, and make up your mind to avail laser hair removal or IPL laser hair removal therapy fearlessly. Not just this, it will open up your mind to wear all types of dresses and walk confidently, because when you start

earning appreciation, you definitely earn self-confidence in a remarkable way.
