Article published on March 7th 2012 | Health

Human body is comprised of numerous basics units named as cells. These cells need food for their existence. In fact living things do not need food, but balanced and proper diet including all essential nutrients in equal ratios to remain strong and healthy. Natural capability of the human body to heal and self-repair itself needs two important parts to achieve this job i.e. raw supplies and resulting energy. Cells may die and change themselves in human body, in a systematic and cyclic way. Anti-aging is attainable, it is proven truth and various investigators have revealed that. Various foods like milk, chocolate, high consumption of carbohydrates and sugar affect deterioration and diet like raw seed, raw fresh vegetables and fresh fruits cause rejuvenation.

Argan oil is very beneficial for anti-aging. This oil is extracted from raw seeds of Argan tree. Seeds are potted in the hard nut of Argan fruit. This truth makes it a great challenger for anti-aging agents. Argan oil is the best for regeneration of skin in many ways. It is proved that 80% unsaturated important fatty acids in Argan oil assist protect and lessen tenderness, a very lethal agent affecting anti-aging. Because of anti-aging the skin loses its tightness and softness which are one of the most common and clear sign of anti-aging. Argan oil is very effective to fight against these deterioration causes.

Another very essential part of Argan oil is Phenolic compounds. These compounds prevent your body not in favor of the chemical reactivity of free radicals. Sterols in Argan oil prevents the important protein established in human joints named Collagen, hence protecting the joints and skin from going out of look.

High concentration of unsaturated fatty acid in this oil reduced the cracked and dry skin better. Daily uses of Argan oil assists in eliminating bad marks and scars on skin. It is also very helpful in eliminating the stretch marks, wrinkles and other blemishes on the skin.

Argan oil is very beneficial for anti-aging process, as we mentioned above. So it is very effective to include Argan oil in your diet and also for skin care.

Argan oil has other various benefits such it is very beneficial for all types of skin issues like wrinkles, acne, stretch marks and many more skin problems. This oil also has many health benefits such as it is very effective cardiovascular problems and keeps your heart healthy and it is also helps you in reducing the effects of cancer and so on, so it is very important to include argan oil in your diet as well.
