Are Wrinkles giving you Nightmares? then try Botox by [George Benson](#)

Article published on January 3rd 2012 | [Health](#)

As a person ages with time there are various lines that develop in the face of a person and so a person who wants to retain their looks for a longer period of time they can try out different methods with the help of science and technology. But it is really nice to see that with the advancement in technology you can look 25 if you are 55. Isn't this trend amazing? This is the magic that Botox does to people.

Over the years botox has gained a huge market when it comes to anti ageing products and botox offers a simple and effective method to look younger and beautiful than your age. In botox the injections are injected into the muscles and the facial skin helps to plump the skin so that the wrinkles disappear. It also helps in pulling the muscles tight so as to give an overall younger, fresher and youthful appearance. But with these injections there are chances that the task is not performed in a proper manner.

Botox just freezes the muscles so even a slight mistake can alter the entire process and can give drastic results. If the injection is injected into any unwanted place as if it is too close to the nerve then the effect can be highly dangerous. As it can also lead to paralysis, breathing problems, vision problems, and various other kinds of complications and the complication would depend upon the area it is injected.

So you can try Botox treatment in a jar, yes now it is available in bottles where you can apply it as a cream. Since the time these Toronto Botox and Botox Toronto have been used since that time it has gained in popularity and these creams offer the same benefit as it gives to the botox injections. But it is very important to check the ingredients and only use the cream if it has been advised by the doctor.

If any skin care product has to get into the skin then it must have molecules that are small enough so that it can get absorbed into the surface of the skin. So not every manufacturer of botox, Toronto Botox and Botox Toronto is an expert in this procedure so before getting to know the product one should analyze whether the cream is useful or not. It is very important that the cream should contain the content that has a high level of Argireline and hyaluronic acid. If these two components are present in the cream then it would be effective and will bring the desired results which will be everyone to see.
