Article published on May 21st 2012 | Health

Have you ever heard about the body sensor networks? Basically, it is the network of sensors which are deployed on humanâ€™s body. It is mainly designed for the application of health care monitoring. There are many cases of untimely death due to heart attacks or kidney damages without any signs. This network is specifically made to find that silent signs so that such type of chronicle diseases can be easily evaluated in the initial stage. It provides proper health care to an ageing population.

From last few years, it has become very popular and gained significant interest in the fields of academic as well as production. It is not even used for medical purposes but also used for life-style monitoring, sport and security, in-vivo monitoring, intervention for healthcares well as for fitness. The main focus of such type of systems to collect the information and present or store that data for treatment rather than on autonomous real-time decision-making.

It can easily monitor the Explosive Ordnance Disposal operatives during the mission with the help of collection of physiological data like multipoint skin temperature and postural information or body acceleration. This type of data is also required for the prediction of heat stress, so BSN networks are deployed on the body in order to get the information about the heat stress.

BSN kaufen provides you a lot of applications. The major application is used in the medical domain. But it is not restricted only to the medical applications only. In it, the applications are divided into three categories which are given below:

First and main application is concerned with medical. It is widely used to medical health care field. It is the easiest, cheapest health monitoring of the patients.

Next application is concerned with entertainment and amusement. It is also used in the video streaming, 3Dvideo, sports, data ï¬•le transfer, Multimedia and gaming applications and many more.

It provides proper assistance to the persons with disabilities like muscle tensions, blindness or speech disability and others type of disabilities.

There are three types of BSN available in market- Managed body sensor networks,Autonomous body sensor network,Intelligent body sensor networks.These different networks are performing different type of tasks and functions.

At last, BSN Kaufen is providing a number of advantages to us. It is very cheap in cost and provides you all the required results very quickly and easily.
