Article published on January 6th 2012 | Health

These days there are lots of things that we are concerned of. We are worried about our career, our life, our pockets and last but that tops the chart is our looks. Well! Itâ€™s not funny and people, especially youths, spend hours just to look fit, smart and handsome. Not only youths, middle aged as well as people over 40 years are also seen to be conscious about their looks as they too want to look youthful and beautiful. And this is well understood by the cosmetic surgeons in Toronto.

Cosmetic Surgery in Toronto has increased in the last few years. There are several researches conducted on the amount of people going for a cosmetic surgery. These researches have showed surprising results about the number of people going through with these surgeries are increasing every year. Not only that all these patients are found to be going for the Botox, Rhinoplasty and Lip Augmentation like surgeries. The most operated is the Lip Augmentation, which has become a craze among young women after the renowned Hollywood actress Angelina Jolie made news undergoing the lip correction job.

Lips forms the focal point of the body, especially in women and that is the reason why they go for the lip job to make themselves look more attractive. Lip Augmentation in Toronto can be either temporary or permanent. The temporary lip augmentation is done using inject able fillers. These fillers are mainly the products made out of hyaluronic acid and include Juvederm and Restylane. This process takes around 5 minutes. In the permanent procedure, a lip implant made of silastic is usually used. Though they look natural but can be felt when squeezed by our fingers. Lip Augmentation in Toronto has grown popular in the last few years.

Botox in Toronto is mainly a Botulinum toxin that is produced by the bacterium Clostridium botulinum. This protein is also known as Dysport or Xeomin and is used in several cosmetic surgeries all over the world. Botox is mainly used to cure facial problems like wrinkles between eyebrows, crowâ€™s feet, wrinkles around the mouth and on forehead. Botox in Toronto is mainly injected into the sweat glands where it blocks the neurotransmitter that connects the nerves to the sweat glands.

In Toronto, Rhinoplasty is mainly the nose job that is done to correct the facial balance between the eyebrows and the nose to enhance the beauty and help look more youthful. In Rhinoplasty the cartilage and bone is trimmed and sutured to give an enhanced shape to the nose. Besides these three, people are also undergoing brow lift, cheek implants, face lift, laser hair removal and many more as a part of Cosmetic Surgery in Toronto.
