Cost of a Pretty Smile by [Scott Bell](#)

Article published on March 29th 2012 | [Health](#)

Want to hear something surprising

A recently conducted survey revealed that 78% of Americans have had at least 1 cavity by age 17. Not shocking enough Well how about the fact that 33% of Americans have untreated tooth decay, mostly because most people are unable to afford having a dental insurance. But a lot of people don't realize the extreme importance of having healthy teeth and a healthy gum. For example, many are not aware that periodontal bacteria can enter the blood stream and travel to major organs and begin new infections.

However, the statistics mentioned above seem to contradict the fact that the industry of dental care is very successful in the United States and that dental offices are in constant need of dental supplies especially orthodontic supplies.

According to the recent American Academy of Cosmetic Dentistry Survey, 92% of Americans believe that an attractive smile is an important social asset. And those who are willing enough to invest a part of their fortune in their smiles must also be willing to invest a portion of their time at their dentists' offices. One of the most common treatments that patients ask for, is teeth whitening. The reason behind this Coffee, wine and cigarettes are only a few examples of the so many substances that stain teeth.

When patients walk into a dentist's office, it usually seems like a clean friendly place. But what most patients fail to uncover, is that it takes a lot of effort to keep such a place up and running. Shopping for dental supplies would have been such a hassle if it weren't for all the companies that offer to sell dental supplies online. This helps dentists and their assistants consume less time on shopping for the dental supplies their offices require, which usually include lots of orthodontic supplies.

One of the largest dental supplies and products companies in the area is called Prestige Dental Products where you can buy products online at Prestige dental products or call to drop your order at 877-772-3888

One of the most common categories that clients ask for in considerable quantities, both online and over the phone, is orthodontic supplies says a sales representative from a major dental supplies company.

As a conclusion, it seems like dentistry has its pros and cons as discovered from a patient who asked the dentist, if it wasn't nasty to be all the day with the hands in someone's mouth. The dentist answered I just think of it as having my hands in their wallet.
